Nina, Terrie et al:

Congratulations on this great paper linking your scientific research on pteropods to practical management applications for resources managers. I am certain your new approaches for using pteropods as a simple, practical indicators of ocean acidification stress will prove to be useful in future OA studies. I will do everything I can to make sure this information gets distributed to the widest possible audience.

Great Job to you and all of your co-authors!

Dick

Dear co-authors,

I am very pleased to tell you the good news that our article is now available online.

You can access it at this link:

<https://authors.elsevier.com/a/1UUWlXRNLVCjS>

Let me use this opportunity to thank you once again for your endless help, efforts and enthusiasm in making this happen. I am hoping we could joint the forces soon again on the next exciting projects!

All the best,

Nina
